Weldcraft Pro now available in USA

We are now pleased to offer our welder training programme, the 'Weldcraft Pro' in association with

The **Commercial Diving Academy** in Jacksonville, Florida. Mr David Weismen, vice-president of CDA says' "This marks an particularly historic moment, as this excellent training course, which is the only Federally Accredited underwater welding programme in the whole of the US, will allow us to provide the very best welder training available of any dive school anywhere in the World". The Weldcraft Pro is an 80-hour welder training programme, which covers both wet and dry welding. The course syllabus follows the **European Welding Federations** guidelines and provides for a detailed and comprehensive insight for the student into stick welding.

Furthermore each student is provided with a full set of course materials and has a series of learning outcomes to accomplish where continuous assessment is made throughout. Formal qualifications to AWS and/or BSEN ISO 15618-1 are provided.

Seawork Presentation Hits the Spot

A visit to the ADC stand at Seawork this year would have provided you with an insight to the latest diving dress available, or at least that's what I'm told these lovely ladies were wearing? I guess Roger O'Kane, the secretary of ADC would know! We would like to thank ADC for permitting us to generally loiter about the stand in an attempt to be of service; thanks Roger. As many of you know we were asked to present a paper at **Seawork** and it was nice to see such a full house to listen in on our talk. With visitors as faraway as Japan, USA, Greece and Iceland attending, as well as clients a little closer to home, it was nice to see so much interest in our products and services. We shall look forward to attending Seawork next year and hope to see you there. In only 10 months since publication it's a pleasure to announce the book entitled 'A **Welder's Mate**' is selling well, with over 300 sales coming in from all over the world. For more info or to order your copy, visit http://www.specialwelds.com/products2/manual/welders_mate.htm

Anglian Marine Welder's Re-Approved

We are pleased to have been of service to **Anglian Marine Services** again, for training and qualification of both their existing divers, as well as new personnel. Mr. Mike Jones (MD) says' " We are always happy to use Speciality Welds, as not only do they provide an excellent services, but David Keats must be one of the few men formally qualified as a welding engineer, who has a wealth of experience as an ex- welder diver himself" and indeed a welding specialist. David is recognised as an industry expert both in the UK and overseas and this builds confidence for both the client and customer alike, as well as helping get the job done with the minimum of fuss and costs".
