

Cutting Torch

Underwater cutting

from another point of view!

The PVL cutting torch gives you a totally different view at underwater cutting. In stead of using expensive electrodes, we use gas. With this cutting torch you can cut up to 6 times faster, which will decrease the operational costs to a minimum.

With the **unique underwater lighter** you can easaly ignate your cutting torch underwater. This lighter comes together with the torch and some spare parts in one flightcase.

- Easy to use system
- No usage of electrodes
- Cut much quicker than before
- Decrease operational costs
- Competitively priced
- Fast and experienced service
